

I originally hired Mike and BarMar to do some work on my kitchen, they completely renovated my 50's era original kitchen to contemporary. Cabinets, granite counter tops, wood floors, wet bar, pass through, lighting, etc. I was very satisfied with the work so I had them create my master suite and bath in my unfinished 2nd floor. After that, I had them to do a custom fireplace / flat panel TV enclosure and a custom built 8 person square dining table, hanging light that matches the table (chandelier) and built in cabinetry.

I have a lot of time spent and experience with them now and I can say the reason I keep going back to them is the detail oriented nature of their work and how easy they make it. Not having to worry about managing subcontractors and what kind of quality I get has been a big relief. Always on schedule on the jobs I mentioned, highest quality for a fair price.

I can always leave out a key for Mike to show you around my house and the work he did for us if you'd like to see for yourself... by now he knows the house well.

PS, he has given me a tour of his home and the stuff he built... furniture, floors and amazing kitchen are equally impressive. He probably wouldn't bring up his own home to you, but it is a good representation of his work.
